Summary

B.Tech Computer Science & Engineering student (Amity University, Jharkhand, graduating 2027, CGPA 8.7/10) with strong fundamentals in Data Structures & Algorithms, software design, and distributed/concurrent systems. Built a real-time messaging platform supporting 100+ concurrent users using WebSocket-based concurrency, and a normalized PostgreSQL-backed system serving 10,000+ records with sub-300ms query performance. Solved 100+ DSA problems on LeetCode spanning arrays, trees, graphs, and dynamic programming. Comfortable working across the stack in Java, Python, and C++, with growing exposure to large-scale system design through hands-on project work and self-directed study.

Technical Skills

Languages: Java, C++, Python, JavaScript

Core CS Fundamentals: Data Structures & Algorithms, Object-Oriented Design, Operating Systems, Database Management Systems

Concurrency & Distributed Systems: WebSocket-based concurrent connection handling, multi-user real-time messaging, asynchronous request processing

Backend: Spring Boot, Spring Security, Hibernate (JPA), REST APIs, JWT, WebSocket, STOMP

Frontend: React.js, HTML5, CSS3

Databases: PostgreSQL, MySQL – schema design, indexing, query optimization at scale

Tools: Git, GitHub, Jupyter Notebook, Google Colab

Machine Learning (Learning): ANN, CNN, TensorFlow, Scikit-learn, LangChain/RAG

Education

Amity University, Jharkhand — **Ranchi, India**

B.Tech – Computer Science & Engineering — CGPA: 8.7 / 10 — Expected Graduation: 2027 — *2023 – 2027*

Relevant Coursework: Data Structures & Algorithms, Operating Systems, Computer Networks, Database Management Systems, Object-Oriented Programming, Probability & Statistics

Elite Public School — **Daltonganj, India**

Senior Secondary (Class 12), CBSE Board — *2022 – 2023*

Experience

Main Crafts Technology — **Remote, India**

Software Engineer Intern — *May 2026 – Present*

- Developed a full-stack web application using **Java, Spring Boot, and MySQL**, implementing RESTful endpoints to handle structured data requests.
- Built and integrated responsive forms with **Spring Boot REST controllers** to process and validate user submissions.
- Implemented data persistence using **Spring Data JPA and Hibernate** for efficient CRUD operations against a MySQL database.
- Designed a dynamic dashboard to retrieve and render stored user data, gaining hands-on experience with MVC architecture and frontend-backend integration.

Projects

ChatBridge – Real-Time Chat Application [GitHub] — *Java, Spring Boot, WebSocket, STOMP, React.js*

- Built a real-time messaging platform supporting **100+ concurrent users** using **WebSocket + STOMP**, managing concurrent client connections and message broadcast without race conditions.
- Achieved **sub-100ms** message delivery latency by designing an efficient publish-subscribe architecture for asynchronous, multi-client communication.

HireMind – Full-Stack Job Platform [GitHub] — *React.js, Spring Boot, Spring Security, Hibernate, PostgreSQL, JWT*

- Architected a full-stack job marketplace with **role-based access control** across 3 user types; secured **15+ REST endpoints** with JWT authentication.
- Designed a normalized **8-table PostgreSQL schema** with indexed queries, enabling keyword-based search across **10,000+ records** in under **300ms**, demonstrating attention to data structure design and query performance at scale.

Certifications & Achievements

- **100+ LeetCode Problems Solved:** Strong command of Data Structures & Algorithms covering arrays, linked lists, trees, graphs, and dynamic programming.
- **Oracle Certification – Databases for Developers: Foundations:** Relational databases, efficient SQL query writing, data management, and DBMS concepts.
- **Machine Learning A–Z – Krish Naik (Udemy, In Progress):** Covering supervised & unsupervised learning, feature engineering, and end-to-end ML pipelines in Python.
- **National Science Day 2024 – IoT Project Exhibition:** Presented a smart vehicle system using ultrasonic sensors to detect pedestrians, alert drowsy drivers, and autonomously reduce vehicle speed.
- **Amiforia 2024 – Information Team:** Managed official communications, technical coordination, and digital documentation for the university technical fest.
