PUSHKAR VISHWAKARMA

Backend Developer

+919693301116 iampushkar2006@gmail.com LinkedIn GitHub Website LeetCode Ranchi, India

PROFESSIONAL SUMMARY

Backend Developer currently pursuing a **B.Tech in Computer Science & Engineering** with hands-on experience in **architecting**, **designing**, and **implementing** scalable products. Developed a full-stack job platform, enhancing user experience through effective project execution and conducting **functional testing** to ensure software quality. Successfully contributed to the creation of scalable products in a dynamic environment.

EDUCATIONS

Amity University, Jharkhand | Ranchi, India — Aug 2023 - May 2027
B.Tech – Computer Science & Engineering — *CGPA : 8.7 / 10*

- **CGPA: 8.7 / 10**

Elite Public School Daltonganj | Daltonganj, India — Apr 2021 - May 2023
Senior Secondary (Class 12)

PROJECTS

HireMind – Full-Stack Job Platform & AI Resume Analyzer | Github Website — Jan 2026 - Present
Lead Developer

- Developed an **ATS Resume Analyzer** that evaluates resumes against target job descriptions, producing an overall match score along with project, experience, and skills sub-scores, contributing to the creation of scalable products.
- Engineered a skill-gap engine that identifies missing skills from job descriptions and generates a personalized learning roadmap to address these gaps.
- Enhanced the analyzer to auto-generate potential interview questions based on job descriptions and candidate resume content.
- Secured over **15 REST API endpoints** using **Spring Security** and **JWT**, implementing stateless authentication for all user roles.
- Deployed the full stack on **AWS EC2** with an Elastic IP and RDS PostgreSQL, containerized via **Docker Compose** behind an Nginx reverse proxy, utilizing Cloudflare and Let's Encrypt SSL.
- Conducted functional, regression, integration, and exploratory testing to ensure software quality, utilizing test automation tools like **Playwright** and **Selenium**.

Technologies / Tools Used : *React.js, Spring Boot, Spring Security, Hibernate, PostgreSQL, JWT, AWS, Playwright, Selenium, scalable products*

DocuMind – RAG-Based Document Chat Assistant | Github Website — Jun 2025 - Dec 2025
Lead Developer

- Developed a **ChatGPT-style document chat assistant** that allows users to upload files and query them in natural language through a **RAG pipeline**.
- Engineered a dual-service backend comprising a **Spring Boot** service for authentication, document management, and orchestration, alongside a **FastAPI** microservice for embedding generation and retrieval.
- Implemented **semantic search** using **pgvector** on **PostgreSQL**, enabling storage and querying of embeddings generated by **Gemini's gemini-embedding-001 model**.
- Integrated **gemini-3.5-flash** for context-aware chat responses, grounding answers in retrieved document chunks to reduce hallucination.
- Deployed the complete stack on **AWS EC2** with **RDS PostgreSQL** and **Docker**, adhering to the same production pipeline used for HireMind.
- Conducted **functional testing**, **regression testing**, **integration testing**, and **exploratory testing** to ensure software quality, utilizing **test automation** tools like **Playwright** and **Selenium**.

Technologies / Tools Used : *Spring Boot, FastAPI, React.js, Vite, Tailwind CSS, PostgreSQL, pgvector, Gemini API, AWS, Playwright, Selenium*

SKILLS

Databases :	PostgreSQL, MySQL, MongoDB
Frameworks & Libraries :	Spring Boot, Spring MVC, Spring Security, Hibernate, FastAPI, React.js, Vite, Tailwind CSS
AI / Cloud :	Rag Pipeline, Vector Embeddings, pgvector, AWS, EC2, Elastic IP, RDS
Programming Languages :	Java, Python, C++
Soft Skills :	OOP, Data Structures & Algorithms, Database Optimization, JWT, self-starter, strong sense of self-motivation
Tools & Platforms :	Docker, Nginx, Git, GitHub, Maven, JUnit, Mockito, Postman, IntelliJ IDEA, VS Code

AWARDS & ACHIEVEMENTS

- Strengthened problem-solving and code optimization skills.
- Solved 170+ algorithmic problems focusing on data structures and dynamic programming on Leetcode.

CERTIFICATIONS

- Oracle Certification– Databases for Developers: Foundations: Deepened expertise in relational databases, DBMS concepts, efficient SQL query writing, data management, and leveraging database features for application development.
- Google Cloud– Troubleshooting Certificate (Google Code Vipassana): Hands-on certification in diagnosing and resolving cloud infrastructure and application issues.
